

Detour and Construction Staging Plan

WHY:

The effort of preparing a construction staging plan will help to determine:

- A. How many stages of construction is anticipated.
- B. If a detour of traffic will be necessary.

HOW:

- Construction staging plans shall be develop for all legitimate alternatives.
- From the construction staging plans it can be determined if a detour will be need for traffic control.
- If a detour plan is warrant then coordination with outside agencies will be needed. These outside agencies will include local and county officials and engineers.
- Documentation of support from the local county officials for a specific detour route shall be on file and in the FAR.
